

# Conservation

Name:

Date:

**INQUIRY**

**The giant panda population went from 1,100 to 1,800 through conservation. What worked?**

Discuss with your partner. Write your initial ideas below:

## Key Vocabulary

---

Term	Definition
<b>Conservation</b>	Protecting habitats and species.
<b>Captive breeding</b>	Breeding endangered species in zoos/centres.
<b>Seed bank</b>	Stores seeds to protect plant diversity.

## Part A — Strategies

---

1. Describe 4 different conservation strategies. For each, give a real example. [4 marks]

## Part B — Case Studies

---

2. Compare panda conservation (China) with the Wadden Sea protection (Germany). What methods were used? What made them successful? [4 marks]

## Part C — Taking Action

---

3. Design a conservation action plan for Xuanwu Lake, Nanjing. Include: target species, threats, 3 specific actions, how to measure success. [5 marks]
